(Current Biology 25, 2425–2429; September 21, 2015)

In the version of this article originally published online, many of the data points in Figure 2C showed the incorrect color coding, particularly in the case of many data mistakenly coded OTSB (blue) that should have been coded BT195 (orange). Figure 2C has been updated both online and in print so that all data points are now correctly color coded. The authors apologize for the confusion, and for any inconvenience caused.
